DIVYANSHI SHUKLA

divyanshishukla8400@gmail.com | LinkedIn | GitHub | Portfolio

PROFESSIONAL OBJECTIVE

Seeking an impactful Software Engineer role to drive scalable product development, leveraging hands-on expertise in **C#, .NET Core, React, JavaScript, PostgreSQL, and MongoDB** to build high-performance web applications. Adept at software validation and modern engineering practices, aiming to contribute effectively to product innovation while continuously expanding technical skills.

WORK EXPERIENCE

Development Associate - Application Software | **Secure Meters Limited** — **May 2025 – Present**

- Developed, maintained, and optimized scalable web applications and RESTful APIs using **C#** and **.NET Core**.
- Designed and integrated database schemas with **PostgreSQL** and **MongoDB**, optimizing complex queries for fast data retrieval.
- Built responsive, accessible front-end interfaces using **React**, **JavaScript**, HTML5, and CSS3.
- Formulated and executed comprehensive test scenarios, covering manual testing as well as scripted and scriptless automation workflows.
- Identified, logged, and resolved application defects systematically while collaborating closely across development and QA lifecycles.
- Contributed to software validation processes and architectural reviews to guarantee stability, security, and quality compliance.

Web Developer Intern (Remote) | **Digimation Flight Pvt. Ltd.** — **Feb 2025 – May 2025**

- Contributed to live web development projects under senior engineering guidance, adhering to clean coding standards.
- Designed and built responsive, mobile-first user interfaces using **JavaScript**, **React**, HTML5, and modern CSS.
- Integrated client-side interfaces with RESTful APIs, ensuring cross-browser compatibility and seamless performance.
- Actively participated in debugging, testing, and code reviews to improve user engagement and page responsiveness.

Front-End Developer (Live Project) | **NavGurukul Foundation** — **2024 – 2025**

- Gained hands-on experience in a live project focusing on front-end development, intuitive UI design, and responsive layouts.
- Redesigned onboarding flow by implementing interactive tutorials and real-time feedback, reducing drop-off rates by 20%.
- Utilized Git and GitHub for version control, collaborative workflows, and sprint deliverables.

TECHNICAL SKILLS

Languages & Frameworks:	C#, .NET Core, JavaScript (ES6+), React, HTML5, CSS3, Tailwind CSS, Bootstrap, SCSS
Backend & Architecture:	RESTful APIs, Web APIs, Microservices Architecture, CRUD Operations, MVC Pattern
Databases:	PostgreSQL, MongoDB, MySQL
Testing & QA:	Manual Testing, Scripted Automation (Python), Scriptless Automation, API Testing (Postman)
Tools & Platforms:	Git, GitHub, Postman, Visual Studio, VS Code, Figma
Core Competencies:	SDLC, Software Validation, Agile/Scrum, Prompt Engineering (ChatGPT), English Communication

TECHNICAL PROJECTS

Manuscript Comparison Tool — .NET Core, C#, Text Comparison Algorithm, File Processing **GitHub ↗**

- Architected and developed a high-performance comparison utility in **.NET Core (C#)** to parse and detect differences across manuscripts.
- Engineered custom file parsing and text-diff algorithms to accurately identify structural, lexical, and formatting discrepancies.
- Designed modular backend service classes following SOLID design principles to ensure maintainability and testability.

GitHub User Search App — JavaScript, HTML5, CSS3, GitHub REST API **GitHub ↗**

- Built a responsive web application leveraging the GitHub REST API to search and render developer profiles and repositories.
- Implemented asynchronous API querying, dynamic DOM manipulation, and structured error handling for empty or invalid searches.
- Designed clean, card-based interface providing instant visibility into follower metrics, repo counts, and user bios.

Movie Explorer & Discovery Web Page — JavaScript, CSS3, HTML5, Movie Database API **GitHub ↗**

- Constructed an interactive movie catalogue web application fetching real-time data, posters, and ratings via external API endpoints.
- Implemented seamless client-side search filtering, modal detail views, and responsive grid layouts optimized for mobile and desktop.
- Integrated resilient fallback states and lazy loading techniques to enhance page load performance and visual responsiveness.

Interactive Memory Game — JavaScript (ES6+), HTML5, CSS3 Grid & Flexbox **GitHub ↗**

- Engineered a fully interactive browser game spanning 500+ lines of clean, modular JavaScript with state-driven card matching logic.
- Implemented real-time timer countdown, dynamic score calculations, card-flip CSS animations, and local game reset handlers.

EDUCATION

Diploma in Software Programming **2024 – 2025**
NavGurukul Foundation of Social Welfare, Udaipur, Rajasthan

Bachelor of Arts (B.A.) **2021 – 2024**
Lucknow University, Lucknow, Uttar Pradesh

CERTIFICATIONS & HONORS

- **Introduction to Git and GitHub** — Google (Issued January 4, 2025)
- **Prompt Engineering for ChatGPT** — Vanderbilt University via Coursera (Issued July 13, 2024)
- **Generative AI Certification** — Verified Credential ID: 2R9Wq78102uYoj776x (Issued September 21, 2024)
- **Web Design (300+ Hours Coursework)** — Comprehensive Frontend Certification (Issued August 11, 2024)
- **Basic JavaScript Certification** — W3docs (Issued July 11, 2024)
- **English, Culture & Academic Excellence Award** — Awarded by NavGurukul for exceptional dedication, impact, and peer leadership
- **English Communication Professional Certification** — NavGurukul Foundation
